## PROFILE:

With over 15 years of expertise as a full-stack developer, I specialize in delivering comprehensive frontend and backend solutions. My extensive experience makes me an ideal candidate for any team seeking a versatile professional who has virtually handled every challenge in the field.

## EXPERIENCE:

**Full Stack Developer**
Stenson Wolf | Belfast, Northern Ireland | Remote
*January 2021 - Present*

- Contributed to StensonWolf's success in serving a diverse Northern Ireland clientele with bespoke digital products.
- Expertly managed full-stack development projects and collaborated effectively with cross-disciplinary teams to deliver comprehensive web, branding, and marketing solutions.
- Drove the development of a wide array of digital assets, from simple brochure websites to complex corporate platforms and e-commerce.

**Front-End Developer**
Engaging Networks | London, United Kingdom | Remote
*July 2015 - January 2021*

- Contributed to Engaging Networks client needs across fundraising, advocacy, events, and email campaigns.
- Served as a key Frontend resource, overseeing a broad suite of in-house applications including page builders, email tools, event management, and e-commerce solutions.
- Enabled clients to effectively raise funds and conduct advocacy campaigns through robust and versatile application tools.

**Full Stack Developer**
Marketing4Restaurants | Sydney, Australia | Remote
*November 2013 - July 2015*

- Spearheaded the development of innovative in-house applications and toolsets at Marketing4Restaurants, a leader in restaurant marketing.
- Instrumental in the creation of FORBS and FROLO, proprietary online booking systems designed to enhance client service offerings.
- Developed key marketing tools including a Facebook data scraper and restaurant geo-tracking software, contributing to client growth and market penetration.

### Craig Hodgkiss

*Jimbo is an absolutely amazing web developer. I've worked with him on numerous projects and he has always delivered above and beyond my expectations. I couldn't recommend him highly enough and his knowledge is extensive to say the least. A pleasure to work with and I hope to do so many more times in the future.*

### Ian Gil Ragudo

*Jimbo is, for a lack of a better term, a kick-ass web developer and designer. He was not only able to display his HTML5 and Javascript skills by doing his tasks but he takes it to the next level by improving the original vision. He's even capable of making his own framework.*

### Scot Hastings

*Jimbo is an outstanding web developer with an obvious passion for both beautiful sites as well as clean and maintainable code. In my time with him, I saw Jimbo take on both simple static websites as well as a complex, thick-client, Javascript-heavy webapp UI. In all cases he performed well above average.*

### Jon Radoff

*JImbo is a very talented designer who knows everything about Ajax, jQuery, JSON, HTML/CSS, multi-browser design. Highly recommended!*

### Patrick Cadelina

*Jimbo is an expert developer of HTML5 technologies. He writes clean and structured codes while using top notch coding techniques in Javascript. He has a pleasing personality and an attitude of a real rockstar developer.*

## MORE EXPERIENCE:

### Applications Developer

Majestic Media Ltd. | Toronto, Canada Area | Remote
*January 2013 - November 2013*

- Collaborated with a global team of developers at Majestic Media, a leading branding firm in the Greater Toronto Area, renowned for leveraging Facebook applications and advertising.
- Spearheaded the development of bespoke Facebook applications, elevating brand presence for a diverse clientele across various sectors, including food brands and local banks.
- Engineered unique, customized applications and tools, contributing to the company's acquisition by Lynx Equity, by driving significant business growth through innovative social media strategies.

### UI Engineer

Migo | The Fort, Philippines | On-site
*January 2012 - January 2013*

- Engineered a custom JavaScript framework for the Migo Machine's Front-end, pioneering data services in video platforms for emerging markets.
- Spearheaded the UI development of the Migo Machine Kiosk, serving as the lead UI Engineer.
- Oversaw the creation and maintenance of additional tools, including an SMS web application and the Migo Machine tracking system.

### Front-End Developer

Disruptor Beam LLC | Greater Boston Area | Remote
*May 2008 - October 2011*

- Contributed to the development of engaging Facebook games during the platform's gaming zenith, under the banner of Disruptor Beam, creators of Game of Thrones Ascent and Star Trek Timelines.
- Played a pivotal role in the initial development of Thorium, Disruptor Beam's proprietary Front-End game engine, harnessing the power of JavaScript.
- Collaborated closely with a team of skilled Front-End engineers and creative graphic artists to deliver visually stunning and interactive gaming applications.

### PHP Developer

PHILWEBSERVICES, INC. | Cebu, Philippines | On-site
*April 2007 - May 2009*

- Contributed to the development and upkeep of diverse websites at PhilwebServices, a premier Web Development and Design firm in Cebu.
- Collaborated with a team of skilled Web Developers and Designers to produce and maintain a range of digital platforms, including personal, corporate, e-commerce, and hotel booking sites.
- Specialized in multiple CMS and MVC frameworks, delivering bespoke e-commerce application solutions to meet client needs.
